For performance and life cycle advantages, tile, marble and terrazzo are the most durable and beautiful finishes.

- Tile, marble and terrazzo offer unique and versatile design applications.
- Ceramic tile comes in myriad sizes, finishes, colors and decorative patterns, for design versatility in any environment.
- Marble and natural stone are classic and durable, promising generations of beauty and function.
- Terrazzo, a vibrant system of marble or aggregate in a colorful cement or epoxy binder, is equally suited for large institutional floors or intimate areas of high-end design.

The key is trained installers and skilled contractors. That's where IMI can help.
